

PHOTOCERAMICS SYSTEM

AS[®]
print
SO

Our printing systems use ceramic pigments: the printing takes place directly on paper by decal, avoiding middle passages and contributing to the perfection of the output, where the image stability is guaranteed over time. The firing (always on third fire) is made at different temperatures depending on the product.

- > **FIRM PRINTING OVER TIME**
- > **ELEMENTS RESISTANT**
- > **UV RADIATION RESISTANT**

The set includes:

- > **CONSUMER PRODUCTS**
- > **WARRANTY FOR ALL DEVICES**
- > **TRAINING AND UPDATING SESSIONS**
- > **QUALIFIED TECHNICAL ASSISTANCE**

Our system is easy to use on any surface: a basic knowledge of graphics and foto-retouch software is enough. The components of our system are guaranteed by Assoprint quality and know-how, as well as by a team of qualified technicians who will guide you during the starting phase of your plant.
